EPA Registration in Ghana N° PCL/21275/1886G

BIOFUNGICIDE FOR POST HARVEST TREATMENT OF CROWN ROT IN BANANA

BanEco® 20 SL is a biofungicide formulated as a soluble concentrate (SL) to be diluted in water. **BanEco® 20 SL** contains 20% w/w BLAD active ingredient, a polypeptide extracted from germinated seeds of sweet *Lupinus albus*. It is effective against Crown rot disease caused by *Colletotrichum musae* that damage banana fruits after harvest. **BanEco® 20 SL** distinguishes itself by the presence of a patented bio polypeptide active ingredient, offering multisite mechanisms of action (FRAC Code BM 01).

Mixing and rates of application (suggested):

The product must be diluted in water. In case of a mixture with aluminum sulfate, dilute at first the aluminum sulfate in water, agitate before adding BanEco® in the mixture, then agitate again.

The application dose is 1.5 % (1.5 L BanEco® in 100 L water).

Apply the solution on top of the processed hand of banana before they are packed. Application can also be directed and localized on the crown of banana hands during packing process.

Directions for use and safety precautions:

- Use clean water without any particles in suspension.
- Do not eat, drink or smoke during the application.
- Keep out of reach of children and of food and feedstuffs.
- Keep the product in its original packaging.
- Avoid contact with skin or eye.
- After handling, put the product in closed room and wash the sprayer.
- After use, destroy and bury the empty packaging.
- Wash thoroughly with soap and water after the treatment.
- In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
- Wear an eye / face protection.
- Do not contaminate water supplies (50 m minimum).
- No specific antidote:

Treatment is symptomatic.

SHELF LIFE: 3 years after manufacturing date (see on the pack) in its original closed packing.
LOT/ BATCH N°: see on the pack

MANUFACTURING DATE: see on the pack
